Evangelism 105 HW 6

What is a small group?

A small group is a group of people who come together either weekly or bi weekly. They come together to encourage one another in the Lord and study His word. The small group is an incredible tool one must have and use. It is a place for transparency, fellowship, and prayer. A small group is a powerful group that comes into agreement with each other and lifts each other up. It is a place one can come to when things need to be celebrated or supported. It is usually a group of 12 or less but can be more. This is another way to shepherd and counsel the sheep of the church. During the small group there is a time of worship, the Word, and prayer. Friendship and fellowship follow small group meetings. It is important that we as Christians are not walking this life alone. God commands that we go to church in order to congregate with other believers. This is just another way to fellowship and become stronger together as believers.
